MySchoolManager is a Complete School Information Management System (SIMS).
It is a Solution designed to handle academic and administrative operations of all school categories.
It offers full, end to end student lifestyle and account managaement solution. It delivers robust features to meet the demanded needs of today's educational sector.
The Architecture is such that enables school implement and begin usage in minutes. Additional hardware and software integration is not required in most cases.

It delivers seamlessly integrated functionality all encompassed in a single package to meet requirement of the school Community

With MySchoolManager your School has complete control over all operations. With its inbuilt knowledge base system, you decide what happens at each time and who [access level staff] uses the application.

MySchoolManager spans over all major activities of your school, with its information system at all door steps, every department has its own log front enabling a coordinated environment just like we are all on our office desk.

What's more...Its intranet network allows everyone in the application to communicate at no extra cost.

...Its all you'll ever need as an Information System...
